

Wells Fargo

The Challenge

The shareholder services call center at Wells Fargo needed a solutions for managed wifi managed with high availability, reliable and fast wireless access for agents spanning three geographic regional campuses across multiple buildings. The campuses are geographically incongruent and the buildings are several decades old with numerous renovations and additions.

The Solution

Our solutions was to partner with Spectrotel to create a virtual unified campus using their proprietary SD-WAN technology, along with Cisco Meraki hardware. Our teams were able to roll-out a seamless deployment across all sites simultaneously. LANTECH added value by uncovered their unique business needs and addressed them from a long term, big picture standpoint. we put in the new hardware, made any adjustments to optimize the solution.

The Result

Solid, fast and secure wireless networking that guarantees proper compliance, meets user demand and exceeds customer expectations.

“LANTECH acted with professionalism and class under pressure. They were aware of our requirements, and took action to ensure success”.
